

PROPOSED AUXILIARY FACILITY (EXPEDITED PROCESSING)

The licensed KGBT-TV Channel 18 full-service digital television broadcast facility's F(50,90) 39.15 dBuV/m protected noise limited contour (File No. 0000130195) completely encompasses the proposed KGBT-TV Channel 18 Auxiliary facility's F(50,90) 39.15 dBuV/m protected noise limited contour in all azimuthal direction pursuant to §73.1675 of the FCC Rules (see showing below).

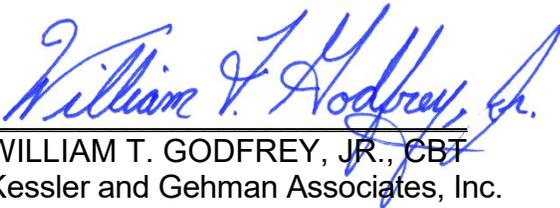

The KGBT-TV tower recently collapsed and the KGBT-TV facility will be operating on the proposed auxiliary facility for approximately one year while the new replacement tower is built in order to remain on the air to serve the public. Therefore, the applicant requests expediting processing so that it can begin using the auxiliary facility immediately without the need for Engineering STAs.

KGBT-TV LIC VS. KGBT-TV AUX

CERTIFICATION

This technical statement was prepared by William T. Godfrey, Jr., President of the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998.
