

WFXW, Greenville, MS (Fac. Id. 25236)
Health Care Notice Compliance

The operating parameters authorized in CP 0000216203 for which a license is now sought are at a lower ERP and slightly smaller coverage area than the licensed parameters at which the station has been operating continuously since its transition to digital operations. Given the continuous operation of WFXW for more than a decade at greater power than the lower power operation now sought, the prior notice to all health care facilities within the station's service area potentially affected by WFXW's DTV operations having made such facilities aware of potential interference, and zero reported instances of interference during this time, healthcare facilities within WFXW's new service area have had ample notice of the potential for interference and conducted normal interference-free operations throughout. Under the circumstances, all healthcare facilities have sufficient notice of the potential for interference and the added assurance of real-time operation of WFXW without any actual interference. For twenty (20) days after commencing operations, should WFXW become aware of any instances of medical devices malfunctioning or that such devices are likely to malfunction due to WFXW's DTV operations, WFXW will cooperate with the health care facility so that it is afforded a reasonable opportunity to resolve the interference problem.
