

**KSJI, St. Joseph, MO (Fac. Id. 81962)**  
**Engineering STA Explanation**

KSJI's transmitter failed on March 8, 2024 and can only provide a transmitter output power necessary to achieve an effective radiated power of 2.24 kilowatts, approximately 16% of its authorized ERP. A new transmitter has been ordered but will not arrive and be installed by the 30<sup>th</sup> day of reduced power operations. UNWSP respectfully requests authority to temporarily continue operating at reduced power for the earlier of 180 days or until such time as repairs are completed.
