Re: BL-11355
WFUN(AM) - Ashtabula, OH
(Facility ID # 54565)
Media One Holdings, LLC

This letter serves to request the re-issuance of the above referenced license for WFUN(AM) - Ashtabula, Ohio to reflect the correct heights for all four towers used in both the daytime and nighttime patterns and resolve a discrepancy in the heights of Towers #1, #2, and #3 between the two patterns. It also requests the addition of the Antenna Structure Registration Numbers ("ASRN") for each of these towers to this license.

Specifically, it is requested that this license be modified and re-issued to reflect the following electrical height and ASRN data for each of these towers:

<u>Tower</u>	<u>Electrical Height</u>	<u>ASRN</u>
1(S)	77.1 meters(89.8 degrees)	1013835
2(SC)	77.1 meters(89.8 degrees)	1013834
3(NC)	77.1 meters(89.8 degrees)	1013833
4(N)	107.6 meters(125.3 degrees)	1013832

All the other parameters presently specified in this license appear to be accurate. Let me know if you have any questions or require any additional information.

Sincerely,

Roy Stype
