

## W250BJ STA Request

We request special temporary authority (“STA”) to operate FM Translator Station W250BJ from its licensed facilities as specified in FCC File No. BLFT20101008AAF, but with power reduced from 250 watts to 175 watts.

This request is made out of an abundance of caution as we seek to determine compliance with § 74.1232(b) and evaluate various options for Station W250BJ and/or co-owned FM Translator Station W290CD.

Provided below is a 60 dBu contour map depicting operation of Station W250BJ at the requested 175 watts power level and the 60 dBu contour of Station W290CD as licensed.
