**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Johnson Broadcasting Ventures, LTD ("JBV"), licensee of FM translator station W289BL, Channel 289D, Rocky Mount, North Carolina. JBV has a construction permit (BPFT-20100519ADP) to make minor changes in the W289BL facilities. JBV herein submits a license application to cover the outstanding permit. Attached as Exhibit A is a calculation of the transmitter power output for FM translator W289BL.

There are two special operating conditions/restrictions listed on the W289BL permit. The first condition states, "The permittee/licensee, in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radio frequency electromagnetic fields in excess of FCC guidelines." JBV recognizes its obligations under this condition.

The second condition states that, "Prior to commencing program test operations, FM Translator or FM Booster permittee must have on file at the Commission, FCC Form 350, Application for an FM Translator or FM Booster Station License, pursuant to 47 C.F.R. Section 74.14." This instant application satisfies this condition. Based on the foregoing, it is believed all conditions on the W289BL construction permit have been satisfied.
