TECHNICAL EXHIBIT
APPLICATION FOR MINOR MODIFICATION
OF CONSTRUCTION PERMIT
STATION WACH-DT (FACILITY ID 19199)
COLUMBIA, SOUTH CAROLINA
CH 48 600 KW (MAX-DA) 464 M

Technical Narrative

This Technical Exhibit supports a minor modification of construction permit for digital television (DTV) station WACH-DT on channel 48 at Columbia, South Carolina. Station WACH-DT is authorized (CP) to operate with a directional antenna maximum effective radiated power (ERP) of 1000 kW and an antenna height above average terrain (HAAT) of 179 meters (BPCDT-19991012ACI).

Proposed Facilities

This minor modification proposes to change transmitter site, decrease ERP, increase HAAT and change the directional antenna pattern. The proposed site is located approximately 23 kilometers east-northeast of the current site and is a more favorable location due to the fact that the majority of the Columbia TV/DTV stations operate in this area. The proposed (NAD 27) site coordinates are: 34-06-58 N, 80-45-51 W). A directional antenna maximum ERP of 600 kW and antenna HAAT of 464 meters is hereby proposed. The FCC antenna structure registration number is 1055358. There is no proposed change in channel or city of license (Columbia).

The proposed transmitter site is more than 800 kilometers from the closest point of the Canadian border. The site is more than 1,500 kilometers from the closest point of the Mexican border. The closest FCC monitoring station is at Powder Springs, Georgia, approximately 366 kilometers to the west. The closest point of the National Radio Quiet Zone (VA/WV) is approximately 377 kilometers to the north. The closest point of the Table Mountain Radio Quiet Zone (CO) is more than 2,200 kilometers to the west-northwest. The closest radio astronomy site operating on TV channel 37 is at Green Bank, West Virginia, approximately 487 kilometers to the north. These separations are sufficient to not be a concern for coordination purposes.

Nearby Broadcast Facilities

There are no known authorized full service AM stations within 5 kilometers (3 miles) of the proposed transmitter site. The following is a list of known authorized full service FM and TV stations within 16 kilometers (10 miles) of the proposed site.

<u>Station</u>	<u>Channel</u>	<u>Bearing(°True)</u>	<u>Distance(km)</u>
WMHK, Columbia, SC	209C	180	2.1
WWDM, Sumter, SC	267C	134	10.5
WNOK, Columbia, SC	284C	286	14.0

WRLK-DT(CP), Columbia, SC	32	271	15.9
WRLK-TV(CP), Columbia, SC	35	271	15.9

Although no adverse electromagnetic impact is expected, the applicant recognizes its responsibility to correct problems that may result from its proposed operation.

Allocation Study

Interference calculations have been made using the procedures outlined in the FCC's OET-69 bulletin, using a 2 kilometer grid spacing. The proposed WACH-DT operation does not cause excessive (greater than 2%, up to 10% total) calculated interference to any analog or DTV station and therefore complies with the FCC's 2%/10% interference standard. Below is the list of stations considered in the OET-69 analysis.

Stations Potentially Affected by proposed WACH-DT						
Chan	Call	City/State	Bear (°T)	Dist (km)	Status	App. Ref. No.

From the above list of stations considered, the table below shows the calculated interference caused to each station. Only stations that are predicted to receive interference from the proposed WACH-DT operation are shown in the interference table.

OET-69 Interference Analysis		
Study Station	Baseline	Net Population Change/Interference
47 WJZY-DT BELMONT NC (CP)	2,298,101	5,002 (0.2%)
47 WJZY-DT BELMONT NC (PLN)	2,298,101	3,731 (0.2%)
47 960722KG COLUMBIA SC (APP)	Not considered/No interference studies required as 960722KG is a non-authorized vacant NTSC allotment	
48 WHOT-DT ATHENS GA (CP)	3,052,616	223 (0.0%)
48 WHOT-DT ATHENS GA (PLN)	3,052,616	1,477 (0.0%)
48 WUPN-TV GREENSBORO NC (LIC)	1,625,707	6,829 (0.4%)
48 WUPN-TV GREENSBORO NC (CP)	1,946,601	5,592 (0.3%)
49 WITV-DT CHARLESTON SC (PLN)	825,044	18 (0.0%)
49 WITV-DT CHARLESTON SC (CP)	825,044	63 (0.0%)
49 WRET-TV SPARTANBURG SC (LIC)	1,091,226	159 (0.0%)

The proposed WACH-DT operation does not cause calculated interference to any other analog or DTV station. Therefore, it is believed the proposal complies with the FCC's 2%/10% interference standard.

Class A Consideration

The FCC's list of low power television (LPTV) assignments eligible for Class A status and the FCC CDBS system have been reviewed for potential Class A impact. The proposed WACH-DT operation will not cause any prohibited contour overlap to any Class A station.

Radiofrequency Electromagnetic Field Exposure

The proposed WACH-DT facilities were evaluated in terms of potential radio frequency (RF) energy exposure at ground level to workers and the general public. The radiation center for the proposed DTV antenna is located 460.2 meters above ground level. The maximum DTV ERP is 600 kW. A conservative relative field of 0.15 was used for the

calculation (see Figure 2C). Therefore, the “worst-case” calculated power density at a point 2 meters (6.6 feet) above ground level is 0.0021 mW/cm^2 . This is less than 0.5% of the FCC's recommended limit of 0.45 mW/cm^2 for channel 48 for an “uncontrolled” environment.

Access to the transmitting site will be restricted and appropriately marked with warning signs. As this is a multi-user site an agreement will control access. In the event that workers or other authorized personnel enter restricted areas or climb the tower, appropriate measures will be taken to assure worker safety with respect to radio frequency radiation exposure. Such measures include reducing the average exposure by spreading out the work over a longer period of time, wearing "accepted" RFR protective clothing and/or RFR exposure monitors or scheduling work when the stations are at reduced power or shut down. The proposed WACH-DT operation appears to be otherwise categorically excluded from environmental processing.

If there are questions concerning the technical portion of this application, please contact the office of the undersigned.
