**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of WRXK License LP ("WLL"), licensee of FM translator station W251AL, Channel 251D, Fort Myers, Florida. WLL has a construction permit to make minor changes in the W251AL facilities (BPFT-20120709AEC). This instant application seeks a license to cover the outstanding permit. Exhibit A is a calculation of the transmitter power output for FM translator W251AL.

There are two special operating conditions/restrictions listed on the W251AL permit. The first condition states that WLL will reduce the power of W251AL or cease operation to insure persons with access to the site are not exposed to radio frequency radiation levels above the limits. WLL states that it will, in cooperation with other tower users, reduce the power of W251AL or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines.

The second condition states that an application on FCC Form 350 will be submitted prior to commencing program test with the facilities authorized in the underlying permit. This instant application satisfies this condition. Based on the foregoing, it is believed that WLL has complied with all conditions and can operate W251AL in accordance with Commission rules.
