

EXHIBIT 15

The applicant is the licensee of five (5) additional translator stations, and eight (8) construction permits for new translator applications. The applicant also has thirteen (13) construction permit applications filed during the Auction 83 filing window which are mutually-exclusive with other applications. None of the presently-authorized facilities or construction permits, nor any of the mutually-exclusive pending construction permit applications, has a 60 dBu service contour which overlaps the 60 dBu contour of the proposed facility.
