

GARY GRAHAM BROADCAST ENGINEERING

PETITION TO RECONSIDER
K278BO – BPFT-20111220ABU
FACILITY ID 153820
1/27/2012

Applicant seeks reconsideration of the Application for K278BO. Our Application was dismissed due to an overlap issue (74.1204(a)) with KVIL which is a co-channel station. In this Petition, Applicant seeks to change to channel 277 which then will eliminate all overlap issues.

Station KESN, 103.3 which would be the co-channel contour in which our Application would need to clear. Our predicted field strength contour does clear KESN and complies with section 74.1204(a)

Therefore, the Application now submitted with this Petition resolves the issue in Section III(a) question 12 of the Application.

/s/ Gary L. Graham
