

APPLICATION FOR STATION LICENSE
LEGEND COMMUNICATIONS OF WYOMING, LLC
KZZS (FM) RADIO STATION
CH 252A - 98.3 MHZ - 0.9 KW
STORY, WYOMING
November 2002

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Legend Communications of Wyoming, LLC ("Legend"), permittee of radio station KZZS, Channel 252A, Story, Wyoming. This instant application seeks a license to cover the outstanding construction permit for KZZS (BPH-20021007AAG). Attached as Exhibit A is a calculation of the transmitter output power for KZZS. KZZS is presently operating pursuant to automatic program test authority.

There were three conditions placed on the KZZS permit. The first to the reduction of power or cessation of operation to ensure that persons having access to the site will not be exposed to radio frequency radiation levels in excess of the rules. Legend herein restates it will reduce power, as necessary, to ensure persons with access to the tower and site will not be exposed to levels in excess of the rules. The next condition relates to the proposed antenna system for KZZS. As indicated on FCC Form 302-FM, an Electronics Research, Inc., rototiller antenna has been used in the implementation of service for KZZS, satisfying Condition #2 on the permit. The remaining condition relates to the placement of radio frequency warning signs at appropriate intervals. Legend has posted signs at the gated access road, on the transmitter building and at the base of the tower to warn of radio frequency electromagnetic levels at and near the site. Based on the foregoing, all conditions noted on the KZZS permit have been satisfied.
