In re: Low Power Television Application of:
Apple Valley TV Association, Inc.
Channel 42, East Wenatchee, WA.
File number BLDTL-20090825BTY
Facility Id No.:2494

Dear Applicant:

We are currently processing your above-referenced digital license application. Our preliminary engineering review reveals that the engineering specifications of the digital license application do not match those as granted in the underlying construction permit BDFCDTL-20090610ABR. Your response to my August 28, 2009, e-mail questioning the difference in the ERP shows that the analog and digital facilities were constructed using the same engineering specifications as granted in the underlying analog construction permit BMPTT-20090610ACE.

In addition to the change in ERP from 1.18 kW as granted in the underlying digital construction permit to 0.194 kW as indicated in the above reference digital license application and in your August 30, 2009, e-mail response, you indicated that the coordinates for the digital facility is the same as the analog facility N 47 – 22 -10 – W 120 – 13 – 30 and the coordinates as granted in the digital construction permit are N 47 – 19 – 21 – W 120 – 14 – 23. A change in the antenna location will require that you file a modification to the underlying digital construction permit for authorization to build the digital facility at a different location than granted in the existing construction permit; therefore, the above referenced digital license application IS HEREBY DISMISSED.

Sincerely,

A handwritten signature in black ink, appearing to read "Hossein Hashemzadeh".
