

Exhibit 1

Preclusion Study Channel 286 BNPFT-20030317LDL Facility ID 156274 Milford, PA

April, 2013

Charles Williamson, applicant for a translator station on Channel 286 at Milford, PA herein submits this Preclusion Study in accordance with the Public Notice DA 13-247 of March 14, 2013.

This proposed facility is not within any Spectrum Limited Grid, however it lies within 39km of the grid of the Morristown, NJ Spectrum Limited market (Market # 117). The Preclusion Study uses the FCC's LPFM Grid Tool with current data. The following criterion applies when analyzing this proposal:

1. Protect all authorizations and applications on co-channel and first adjacent channels.
2. Ignore second adjacent and IF Requirements
3. Protect existing TV Channel 6
4. Protect existing CP and APP Records
5. Protect existing FM Translators
6. Protect existing TV Channel 6 Translators and LP
7. Ignore all Auction 83 applications.

The Preclusion Study shows that there are five channels that can exist within the Morristown Grid. These channels include 232, 240, 248, 272 and 300. As demonstrated, the subject channel of 286 is not included and as such no preclusion to these future possible proposals exists. There are no available grid points for an LPFM station on channel 286, or its first or second adjacent channels. This proposed facility will have no effect on any LPFM facilities that may operate in the Morristown, NJ grid.

The details of the LPFM Grid Tool are contained below. The subject channel is highlighted in green. The first and second adjacent channels are highlighted in yellow. The channels determined to be available within the grid are highlighted red.
