Subject: Out of Channel Emissions K35DO (BSTA-20100312ABD)

Hello Mohammad,

I received your voicemail message regarding out of channel emission for the Engineering STA requested by Rural California Broadcasting Corporation for television translator K35DO BSTA-20100312ABD).

We have ordered, but have not yet received, a new digital translator transmitter and mask filter for K35DO from Harris Corporation.

When installed and operational, the new equipment will meet the FCC DTV simple mask requirements for out of channel emission specified by the FCC Fifth and Sixth DTV Report and Orders.

Please let me know if I you require further information in order to consider Rural California Broadcasting Corporations STA Engineering Request.

Sincerely,

Larry Stratton
Chief Operating Officer/ Chief Engineer
