\* I created tower records for each of the 6 towers in the array. Three of the towers (towers 2, 3 & 4) no longer require lighting but do require paint. See tower records 126221, 126223, 126226. The other three towers (towers 1,5,6) still require both paint and light. See tower records 47487, 126227, 126228.  
Since I only put one tower per record there are 5 other towers under separate tower records. This statement is shown on each tower record. OKAY?

As for the Daytime tower (Record # 47488). This record was done by ASB Washington staff in 1 We do not have copies of FAA Study, therefore I can only assume this particular structure still requires Paragraph 1 which is painting (especially in lieu of the change to the 3 towers above). Can you verify that there is only 1 daytime tower and that it is not one of the 6 towers in the nighttime array. I'd like to clean this record up. THANKS!

\* NIGHT-TIME:

TOWER NOS. 2, 3 and 4: 1 only

TOWER NOS. 1, 5 and 6: 1, 3, 11 & 21
