July 21, 2009

In evaluating the proposed conversion to digital for K14LM (K57GO) FID 24570, Channel 14 was found to cause lethal levels of interference to KNTA-LP FID 8984 and KMXU-LP FID 38560. A search was made and channel 35 (T) was identified as a displacement channel with acceptable coverage. After thorough searching, channel 35 was found to cause no lethal levels of interference to other stations. Thus, Three Angels Broadcasting Network respectfully requests that the Commission look favorably on this application.
