Re: KWMS-LP FLASHCUT APPLICATION – Tower Discrepancy

File number: BDFCDTL-20100812ABE

Facility ID: 131349

KWMS-LP is an existing licensed facility that is currently authorized to transmit on channel 17. KWMS-LP has applied for a Construction Permit for building a digital facility on the same frequency KWMS-LP is already authorized on. KWMS-LP is currently transmitting it's fully allocated power requirement and is in compliance with FCC regulations.

An error was made on FCC form 346 Section 3 questions 6,7, and 8 and have been corrected with the amended application.

Please contact me for more information.
