September 23, 2009

In evaluating the proposed digital flash cut for K26HS FID 130787, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent new population interference present.

Call sign	Facility ID	ARN	City	Class	Status	New Pop%
KOPB-DT	50589	BDSTA20030428AFA	PORTLAND	DTV STA	Interference	0.00%
KOPB-DT	50589	BLEDT20060630ADD	PORTLAND	DTV	Interference	0.00%

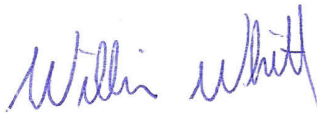

This table below is a list of all the stations considered in the outgoing interference study.

Following this cover letter is the required Form 346, a detailed listing of the interference study, and a coverage map that shows the analog coverage, (green) verses the digital (blue). Thank you for your evaluation of this application.

William Whitt

A handwritten signature in blue ink, appearing to read "William Whitt". The signature is written in a cursive style with a large, stylized "W" and "H".
