**Subject:** KPMW Antenna Certification

Dear Dan,

On December 1, 2003, we prepared the proof of performance for the Jampro JMPC-4 DA RFR for station KPMW. Mr. Earl Tolley reviewed the document and found a discrepancy between the stipulated boom heading on the engineering statement and that on the mechanical drawing. We determined that a clerical error was the cause and we prepared a revision on January 7, 2004. This revision was sent via email to the station's engineering consultant at that time. Apparently, that document was not made available for filing.

Attached is a copy of the revised proof. I apologize for any inconvenience this has caused for the station.

Sincerely,

Dane Jubera  
Senior Antenna Engineer  
jampro Antennas, Inc.
