ENGINEERING STATEMENT:

Request for Extension of Existing
Engineering STA
(BESTA-20150529AAS)

Prepared for
Universal Media Access KKDZ-AM LLC

Radio Station KKDZ
Facility ID # 12112

December 21, 2015

This engineering statement supports an application for extension of an existing Special Temporary Authority, BESTA - 20150529AAS, for KKDZ(AM), 1250 kHz, Seattle, WA.

As outlined in the previous Exhibits 13 and 34 for STA for KKDZ, the station is authorized to operate during certain evening hours (local sunset - 12:00 AM) with a directional antenna. The site lease for this antenna system expired prior to the present ownership's acquisition of the station in late August of this year.

Although the previous owner made some attempts to locate a suitable replacement site for the directional antenna which is necessary for the KKDZ evening operation, those attempts were unavailing. The present owner of the station has been fully aware of the need for such a replacement facility, and has undertaken studies examining the possibility of co-location for diplexed operation with owners of other possible suitable antenna systems. While these studies and subsequent negotiations have not been completed, it is believe that there are at least two technically feasible solutions, and one of these has been tentatively agreed to by the facility owner.

Implementation of a new diplexed nighttime "evening hour" operation at either of the possible locations will require extensive land use approval from the local political jurisdiction, which is also the property owner.

There have not been any complaints of interference that the licensee is aware of during the period of this STA operation, and therefore extension of the authority for an additional six months to allow final site use negotiations, final engineering design, and local land use application and approval is requested.
