MULTIPLE OWNERSHIP SERVICE CONTOUR ANALYSIS

**Prepared for
Chaparral Broadcasting, Inc.
August 2009**

The attached analysis of compliance with the radio multiple ownership rules was prepared in accordance with the Rules and Regulations of the Federal Communications Commission, in connection with a minor change application for station KWYS-FM at Island Park, Idaho.

Unrated Market

As is depicted on the attached ownership study map, the KWYS-FM 70 dBu contour (shown in red) does not overlap the principal community contour of any attributable station (shown in black) with the exception of KEZQ(FM) 225C West Yellowstone. While KEZQ has been reallocated to Iona, Idaho, and holds a construction permit at Iona which does not have principal community contour overlap with KWYS-FM, this study is included to demonstrate compliance for the KWYS-FM/KEZQ cluster.

These stations operate outside any market rated by Arbitron. Therefore, analysis has been made consistent with the Commission's interim rules for unrated markets. The 70 dBu contours of FM stations were determined from the technical data contained in the most recent edition of the FCC FM Database. The listed antenna height above average terrain was used together with topographic data obtained from the digitized 30 second or 3 second database. The 5 mV/m daytime contours of AM stations were determined from the technical data contained in the most recent edition of the FCC AM Database. The listed antenna parameter information was used together with a digitized version of the FCC M-3 or Region II ground conductivity database.

The service contours were plotted using correct map projection mathematics. Those stations

whose transmitter sites are within the respective principal community service contours of the stations proposed to be commonly owned have only the sites rather than their contours shown. All contours and enclosed transmitter site locations have been labeled. A list of all stations considered is included with this statement.

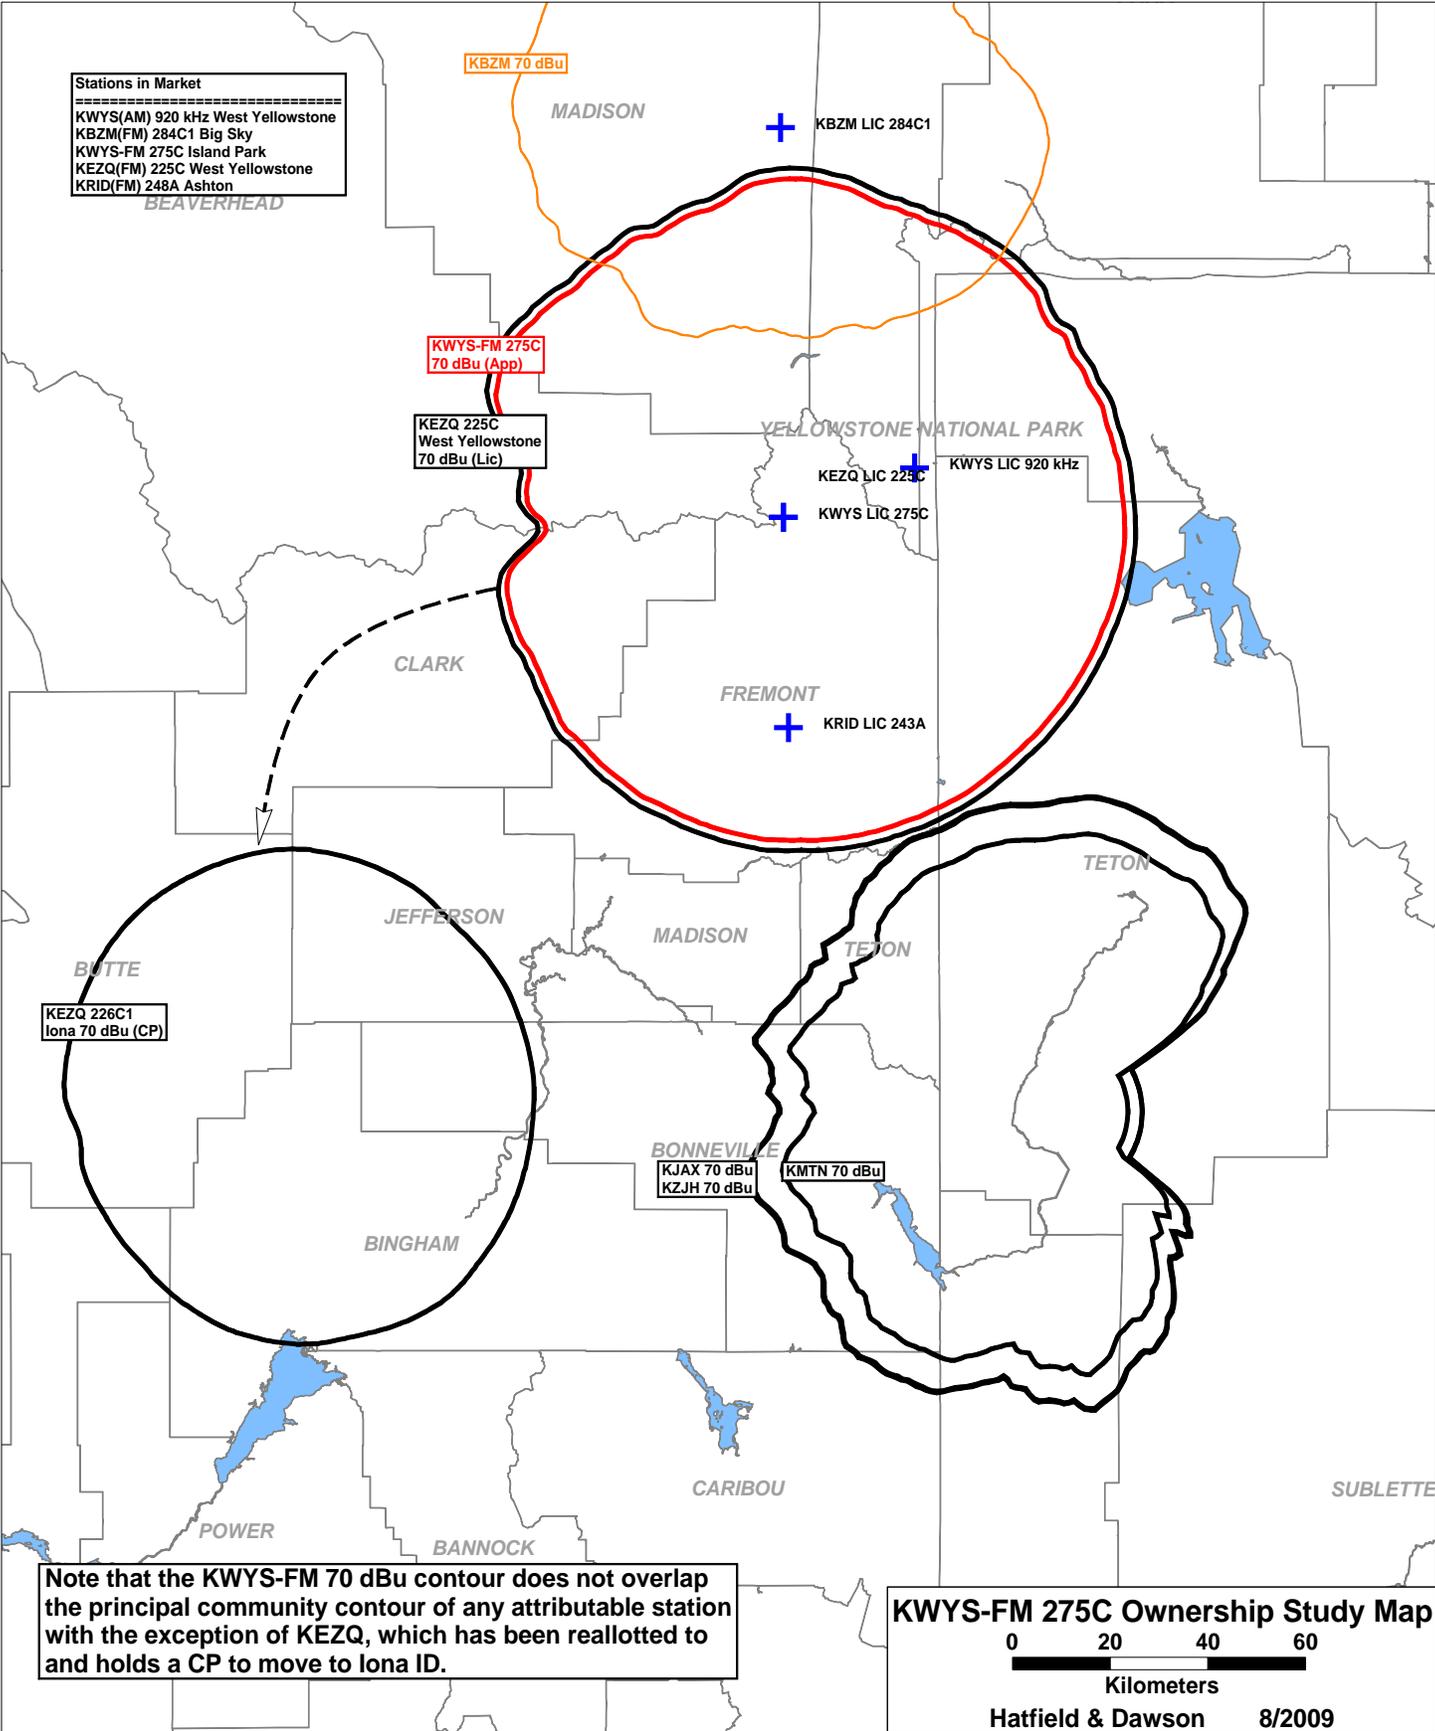

In counting stations providing service to the "market" defined by each of the discrete clusters formed in unrated markets, stations whose transmitter sites are located in excess of 92 km from the perimeter of the common overlap area have been excluded, as have other stations to be commonly-owned but which are not a part of the discrete cluster being studied.

This exhibit evidences at least the minimum number of stations necessary to demonstrate compliance with the rules concerning radio multiple ownership in unrated markets. In order to qualify for common ownership of this 0AM/2FM cluster, there must be at least 4 stations in the relevant "market". This study demonstrates that there are at least 5 stations in the relevant market.

August 18, 2009

A handwritten signature in black ink, appearing to read "Erik C. Swanson". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Erik C. Swanson, P.E.

Stations in Market
 =====
 KWYS(AM) 920 kHz West Yellowstone
 KBZM(FM) 284C1 Big Sky
 KWYS-FM 275C Island Park
 KEZQ(FM) 225C West Yellowstone
 KRID(FM) 248A Ashton

**KWYS-FM 275C
 70 dBu (App)**

**KEZQ 225C
 West Yellowstone
 70 dBu (Lic)**

**KEZQ 226C1
 Iona 70 dBu (CP)**

**KJAX 70 dBu
 KZJH 70 dBu**

KMTN 70 dBu

Note that the KWYS-FM 70 dBu contour does not overlap the principal community contour of any attributable station with the exception of KEZQ, which has been reallocated to and holds a CP to move to Iona ID.
