Re: Jackson Hole Community Radio, Inc.
KHOL(FM), Jackson, Wyoming
Facility Identification Number: 92620
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed February 25, 2009, on behalf of Jackson Hole Community Radio, Inc. ("JHCR"). JHCR requests extension of the special temporary authority ("STA") granted on March 26, 2008, and modified on August 27, 2008, to operate Station KHOL with temporary facilities.¹ In support of the request, JHCR states that its application for permanent relocation of Station KHOL remains pending before the Commission.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KHOL may continue to operate with the following facilities:

Geographic coordinates: 43° 36' 32" N, 110° 49' 46" W (NAD 1927)

¹ KHOL is licensed for operation on Channel 206C3 (89.1 MHz) with effective radiated power ("ERP") of 2.2 kW (H&V) and antenna height above average terrain ("HAAT") of 336 meters. Application BPED-20080807ABU proposes relocation of the transmitter and operation with ERP of 1.9 kW and HAAT of 178 meters.

Channel	206 (89.1 MHz)
Effective radiated power:	1.9 kilowatt (Max-DA, V only)
Antenna manufacturer and type:	Scala, CL-FM, log periodic
Antenna orientation:	170° True
Antenna height:	
above ground:	27 meters
above mean sea level:	2554 meters
Above average terrain:	178 meters

JHCR must notify the Commission when licensed operation is restored. JHCR must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 20, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
