

**Engineering Statement in Support of  
Change to the Community of License****Introduction**

Educational Media Foundation requests a community of license change for KVLK from Socorro, New Mexico to Milan, New Mexico.

This statement is included to show that the proposed move to the station KVLK will comply with the 307(b) fair distribution guidelines.

**Discussion**

In the instructions for the new Form 340, the FCC describes several points that are required for a showing that the proposed community of license change would result in a preferential arrangement of allotments under section 307(b). Those requirements have been divided into the two sections below:

**1. Minimum Requirements**

The commission has requested that any 307(b) showing contain the following minimum information:

- The number of stations licensed to the current community of license is two (2). The number of stations licensed to the proposed community of license is one (1).
- The number of stations providing service to the current community of license is six (6). The number of stations providing service to the proposed community of license is 15.
- The population of the proposed community of license is 1,891.
- Milan is a growing village with a population growth of 24% since the 2000 census. Milan has a post office, churches, retail, and government entities such as police department and fire department. See Exhibit 23 – A for a business directory and Exhibit 23 – B for a Google directory of local government entities.

**2. Other Relevant Information****Service Area**

In order to show that the entire area that is currently served by the licensed facility of KVLK-FM continues to be served when the proposed move is granted, several exhibits have been attached.

- Exhibit 23-C shows all facilities that serve any portion of the current KVLK construction permit's coverage area. See Exhibit 23-C1 for a station list.
- Exhibit 23-D is similar to Exhibit 23-C, however in order to make abundantly clear that the area is well served, contours that combine to provide at least 5

services over the entire current construction permit have been colored green with the extraneous contours removed. Exhibit 23-D also provides a color coded showing of the number of stations that provide service within the current licensed contour of KVLK. As can be seen the entire area is well served by 5 or more stations, not including KVLK.

- Exhibit 23-E is a population report that corresponds to the map at Exhibit 23-D. This further shows that 100% of the area and population that are within the current licensed contour of KVLK continue to be well served, should the proposed move be granted.

**Conclusion**

The entire area within the current licensed contour of KVLK continues to be served should the proposed facility be granted.

Respectfully submitted,
