Re: True azimuth of antenna on North Mountain  
Mason County, WA

Attention: Greg Smith

By field survey of the existing structure, I measure the tower azimuth to be as follows:

From the Southerly tower leg to the Northerly tower leg is 16° true.

From the Westerly tower leg to the Easterly tower leg is 164° true.

Respectfully submitted,

Steven R. Stillwell  
Washington Land Surveyor  
Certificate 16928
