

APPLICATION FOR STATION LICENSE
BRAZOS VALLEY COMMUNICATIONS, LTD.
KORA-FM RADIO STATION
CH 252A - 98.3 MHZ - 0.9 KW
BRYAN, TEXAS
May 2013

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Brazos Valley Communications, Ltd. ("Brazos"), licensee of radio station KORA-FM, Channel 252A, Bryan, Texas. Brazos holds a license for KORA-FM (BLH-20061113ABY). Brazos has replaced its antenna. There is no change in transmitter site or effective radiated power. Brazos herein submits a license application as notification of the change of antenna and transmitter power output. The detailed calculation of the transmitter power output for KORA-FM is attached as Exhibit A. It is noted that the KORA-FM license lists the antenna center of radiation at 151.0 meters (495 feet) above ground. To accommodate antenna mounting, the center of radiation for the new antenna is at 147.8 meters (485 feet) above ground. Pursuant to the provisions of §73.875(b)(3), the antenna is considered to be properly mounted, and there is no substantive change in antenna center of radiation.

Based on the foregoing, it is believed that KORA-FM is in compliance with the Commission's rules.
