

## Exhibit 1—Proposed Minor Modification

### Minor Change Request

Music Ministries, Inc., licensee of W275CZ, began program testing on 8/20/2019. Since then, field testing has determined that licensee is receiving an unacceptable amount of interference from first-adjacent ch.276, WGBF-FM. This received interference is inhibiting reception of the new translator in the city of license, Evansville, IN. This proposal is to change to a directional antenna and move down two channels to ch. 273. This should resolve the received interference problem and allow the translator to be heard in the city of license. This is a Minor Change.

The following questions in the TECH BOX are affected:

- 1) Channel changes to 273
- 8) Center of Radiation changes to 109 meters AGL, HAAT to 126 meters AMSL
- 9) ERP changes to 0.250 kW
- 10) Fill-in Compliance
- 12) No interference to licensed facilities is expected.

All the statements, maps and data contained in the following pages are true and correct to the best of my knowledge and belief and were prepared by me or under my supervision. Unless otherwise noted, all data and maps are from *rFinvestigator V.3.524* by *rFsoftware, Inc.* All maps utilize USGS rasterized data and terrain data is based on the USGS 3-second DEM(DMA) terrain database, ver. 2012. Scale is as described on each map and all co-ordinates are NAD 27 datum unless otherwise noted.
