Dear Sir,

This letter will provide additional documentation regarding a proposal for an additional UHF translator to replace the loss of service.

The attached exhibit displays the contours of the analog WMVS licensed facility prior to the transition, the currently licensed digital facility, and the proposed fill-in translator. The addition of a UHF translator for WMVS should provide a signal that can permeate through the downtown buildings better due to the different propagation characteristics of UHF as compared to VHF.

Sincerely,

A handwritten signature in black ink that reads "Gregory Best, PE". The signature is written in a cursive style with a horizontal line through the middle of the name.

President
