**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of radio station WXFX, Channel 236C2, Prattville, Alabama. Cumulus also holds an outstanding permit for WXFX (BPH-20060127APS). Cumulus herein submits a license application to cover this outstanding permit. A calculation of the transmitter power output of the WXFX transmitter is attached as Exhibit A.

There are four operating conditions/restrictions on the WXFX permit. The first condition is that Cumulus must make sufficient measurements to demonstrate that WXFX is in compliance with §73.317 of the rules, based on its use of a shared antenna. Attached as Exhibit B is a harmonic and spurious emissions report showing that the shared antenna used by WXFX, with all stations operating, is in compliance with §73.317 of the rules. The second condition notes that the permit was issued pursuant to §73.215 of the rules. Cumulus acknowledges this condition. Condition #3 notes that the permit was issued under the grandfathered provisions of §73.3555 of the rules. Cumulus acknowledges this condition.

The remaining condition is that Cumulus will reduce the power of WAFX or cease operation, as needed, to insure that persons with access to the tower will not be exposed to radio frequency radiation levels in excess of the Commission's guidelines. Cumulus will comply with this requirement.

Based on the foregoing, it is believed that WAFX is operating in compliance with the Commission's rules and that all conditions have been met.
