

Exhibit 11
Radio Assist Ministry, Inc.
Adjacent Channel Interference
Plainview, Texas

The Proposed translator on FM Channel 277D with facilities of 0.010 watts ERP at a maximum 24 meters AAT is within the 60 dBu protected contour of station KRIA (Plainview, TX.) on 3rd upper adjacent channel 280. The F(50,50) contour with respect to KRIA at the proposed translator site is 83 dBu. Utilizing the undesired to desired method of calculating interference, the proposed interfering contour with respect to KRIA is 123 dBu. The interfering contour (calculated by the free space equation in the worst case radial) will extend a maximum of 16 meters from the proposed antenna.

The antenna of the proposed translator is 4 meters above ground. The interfering contour extending to a maximum of 16 meters. Access to the site is restricted to within 16 meters. There are no buildings, houses or structures in this area. If additional information is requested by the Commission, it will be promptly provided.

Inasmuch as no population inhabits this area, Radio Assist Ministry respectfully requests a waiver of contour overlap regulations with respect to the proposed translator.
