

June 6, 2016

This is to certify that Shively Antenna Model 6810-4R-SS-DA was assembled and installed according to the manufacturer's specifications for radio station KKSP-FM built under the construction permit of South Texas Broadcasting, Inc.

The installation was under the supervision of Bobby Gray, Chief Broadcast Engineer of the Little Rock market stations for South Texas Broadcasting, Inc. I have been a broadcast engineer for twenty-seven years and been involved with the installation of a number of FM antennas.

Attached is the certification letter from Arkansas Surveying & Consulting, stating that the antenna was correctly orientated to the specified azimuth of 184 degrees as a required condition in the FCC construction permit.

Bobby Gray
Chief Engineer
KKSP-FM, KDIS-FM, KHTE-FM
