Re: KGRI Lebanon, OR – Directional Antenna Measurement

Dear Mr. Flyte,

On September 30, 2015, Udell Engineering and Land Surveying physically measured the position of a newly installed radio antenna on an existing tower located approximately 16 miles easterly of Lebanon, Oregon. After final adjustments of the antenna were complete, the directional orientation of the unit was measured to be within 1.00 degrees of North 6 degrees East of geodetic true north.

Sincerely,

Kyle W. Latimer PLS, PE
