In re: Low Power Television Application of:
King Forward, Inc.
Channel 23, Albany, GA.
File no.: BMPDTL-20101019ABH
Facility Id No.: 182924

Dear Applicant:

On December 29, 2010, the licensee as addressed above was sent a 30 day deficiency letter outlining the following interference issue:

Our preliminary engineering review reveals that your proposed facility does not comply with the Commission's interference rules. Specifically, the proposal is predicted to cause interference to the following facilities:

1. New – Facility: 186156, Ashburn, GA. – BNPDTL-20100510ABC

You were given the opportunity to file a minor amendment to resolve the specified interference problem within (30) days from the date of that letter. Amendments must be filed electronically. If not so amended, your application will be considered incomplete and subsequently dismissed.

Our records show that no amendment has been filed as of February 14, 2011, to resolve the above referenced interference problem. Our current interference study shows the same interference as listed above at a 6.5 percent interference level to the New DTV Facility 186156 which is a 2.2 percent increase over the interference level of 4.3 percent of which the New DTV Facility was expected to accept from your underlying construction permit. Therefore, the above referenced modification application is considered incomplete and IS HEREBY DISMISSED.

Sincerely

Hossein Hashemzadeh
Associate Chief
Video Division
