

Exhibit 1

Preclusion Study Channel 255 BNPFT-20030317LBA Facility ID 156320 Port Jervis, NY

April, 2013

Charles Williamson, applicant for a translator station on Channel 255 at Port Jervis, NY herein submits this Preclusion Study in accordance with the Public Notice DA 13-247 of March 14, 2013.

This proposed facility is not within any Spectrum Limited Grid, however it lies within 39km of the grid of the Morristown, NJ Spectrum Limited Market (Market # 117). Further, it is very close to the 39km buffer of the grid of the Newburgh-Middletown, NY (Mid Hudson Valley) Spectrum Limited Market. (Market # 39) Out of an abundance of caution, this Study analyzes the effect on this market as well. The site is not actually located within the Newburgh-Middletown, NY Market.

The Preclusion Study uses the FCC's LPFM Grid Tool with current data. The following criterion applies when analyzing this proposal:

1. Protect all authorizations and applications on co-channel and first adjacent channels.
2. Ignore second adjacent and IF Requirements
3. Protect existing TV Channel 6
4. Protect existing CP and APP Records
5. Protect existing FM Translators
6. Protect existing TV Channel 6 Translators and LP
7. Ignore all Auction 83 applications.

Morristown, NJ

The Morristown Preclusion Study shows that there are five channels that can exist within the Morristown Grid. These channels include 232, 240, 248, 272 and 300. As demonstrated, the subject channel of 255 is not included and as such no preclusion to these future possible proposals exists. There are no available grid points for an LPFM station on channel 227, or its first or second adjacent channels. This proposed facility will have no effect on any LPFM facilities that may operate in the Morristown, NJ grid.

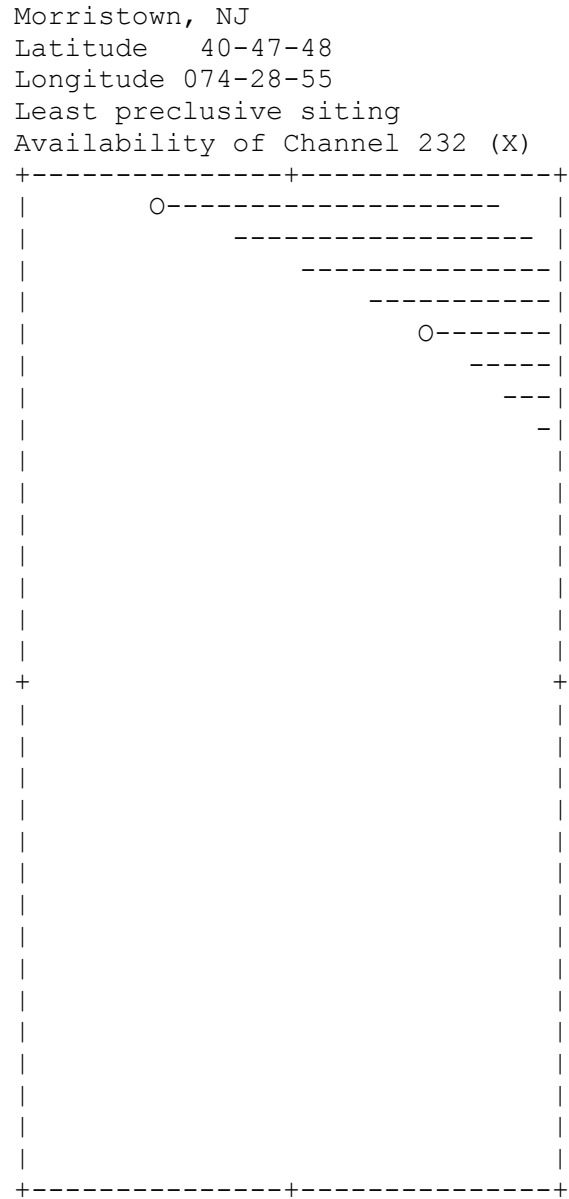

The details of the LPFM Grid Tool specifying the center coordinates of the Morristown, NY Market are contained below. The subject channel is highlighted in green. The first and second adjacent channels are highlighted in yellow. The channels determined to be available within the grid are highlighted red.

Newburgh-Middletown, NY (Mid Hudson Valley)

The Newburgh-Middletown Preclusion Study shows that there are thirteen channels that can exist within the Newburgh-Middletown Grid. These channels include 229, 230, 240, 266, 272, 278, 280, 281, 282, 286, 287, 294 and 299. As demonstrated, the subject channel of 255 is unavailable in this market. There are no available grid points for an LPFM station on channel 255, or its first or second adjacent channels. This proposed facility will have no effect on any LPFM facilities that may operate in the Newburgh-Middletown, NY grid.

The details of the LPFM Grid Tool specifying the center coordinates of the Newburgh-Middletown, NY Market are contained below. The subject channel is highlighted in green. The first and second adjacent channels are highlighted in yellow. The channels determined to be available within the grid are highlighted red.
