

Compliance with Special Operating Conditions

The underlying KARJ construction permit (FCC file number: BPED-20160909AAT) contains several Special Operating Conditions, summarized as follows:

1. The permittee must provide the results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components.
2. The permittee must submit an affidavit that a qualified engineer oversaw the installation of the directional antenna system.
3. The permittee must provide an affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth.
4. Before Program Tests are authorized, the permittee must submit an exhibit demonstrating that the measured directional antenna pattern complies with the appropriate community coverage provisions of Sections 73.315 or 73.515.
5. The relative field strength of neither the measured horizontally nor vertically polarized radiation component exceeds, at any azimuth, the value indicated on the composite radiation pattern authorized by the construction permit.
6. The Automatic Program Test provisions of 47 C.F.R. Section 73.1620 do not apply; a formal request for Program Test Authority must be filed in conjunction with FCC Form 302-FM
7. The permittee shall, upon completion of construction and during the equipment test period, make proper radiofrequency electromagnetic (RF) field strength measurements throughout the transmitter site area to determine if there are any areas that exceed the FCC guidelines for human exposure to RF fields.
8. Documentation demonstrating compliance with the special operating condition(s) shall be submitted at the time of the filing of FCC 302-FM.
9. The permittee/licensee, in coordination with other users of the site, must reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
10. Notwithstanding the grant of this construction permit or the expiration date specified herein, your station's license will automatically expire as a matter of law on October 12, 2017 if the station has not resumed broadcasting before that time. Upon resumption of broadcasting, the licensee must notify the Commission. This notice will be in addition to an application for a license to cover this permit.

Educational Media Foundation ("EMF"), complies with, or agrees to, these conditions, as follows:

1. See Exhibit 9A
2. See Exhibit 9B
3. See Exhibit 9C
4. See Exhibit 9D

5. See Exhibit 9A
6. The instant application constitutes a formal request for Program Test Authority.
7. See Exhibit 9E
8. The instant application provides documentation demonstrating compliance with all Special Operating Conditions.
9. Educational Media Foundation agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
10. Educational Media Foundation will notify the commission upon resuming operations.

Therefore, all Special Operating Conditions of the KARJ Construction Permit (FCC File Number BPED-20160909AAT) have been met.
