

## EXHIBIT 11

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but five other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contours of WCTO, Easton, PA and WBHT, Mountain Top, PA demonstrate that there is no prohibited contour overlap between these five facilities and the instant proposed FM translator facilities. One FM translator has also been included on the maps because of its proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The six facilities that have been included on the attached maps are: WPEL-FM, 96.5, Montrose, PA (54 dBu contour to proposed 34 dBu interference contour); WRDW-FM, 96.5, Philadelphia, PA (54 dBu contours to prop. 34 dBu int. contour); WPGM-FM, 96.7, Danville, PA (54 dBu contour to prop. 54 dBu int. contour); WBHT, 97.1, Mountain Top, PA (60 dBu contour to prop. 100 dBu int. contour); WCTO, 96.1, Easton, PA (54 dBu contour to prop. 94 dBu int. contour); and W244CE, 96.7, Wilkes-Barre, PA (60 dBu contour to prop. 54 dBu int. contour). W245BI 96.5 Hazleton, PA 74.1204(d) Narrative and its related maps are included to show allowable overlap under Section 74.1204(d) with this proposal's 100 dBu and 97 dBu interference contours and the 60 dBu coverage contour of WBHT, Mountain

Top, PA and the 57 dBu coverage contour of WCTO, Easton, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
