

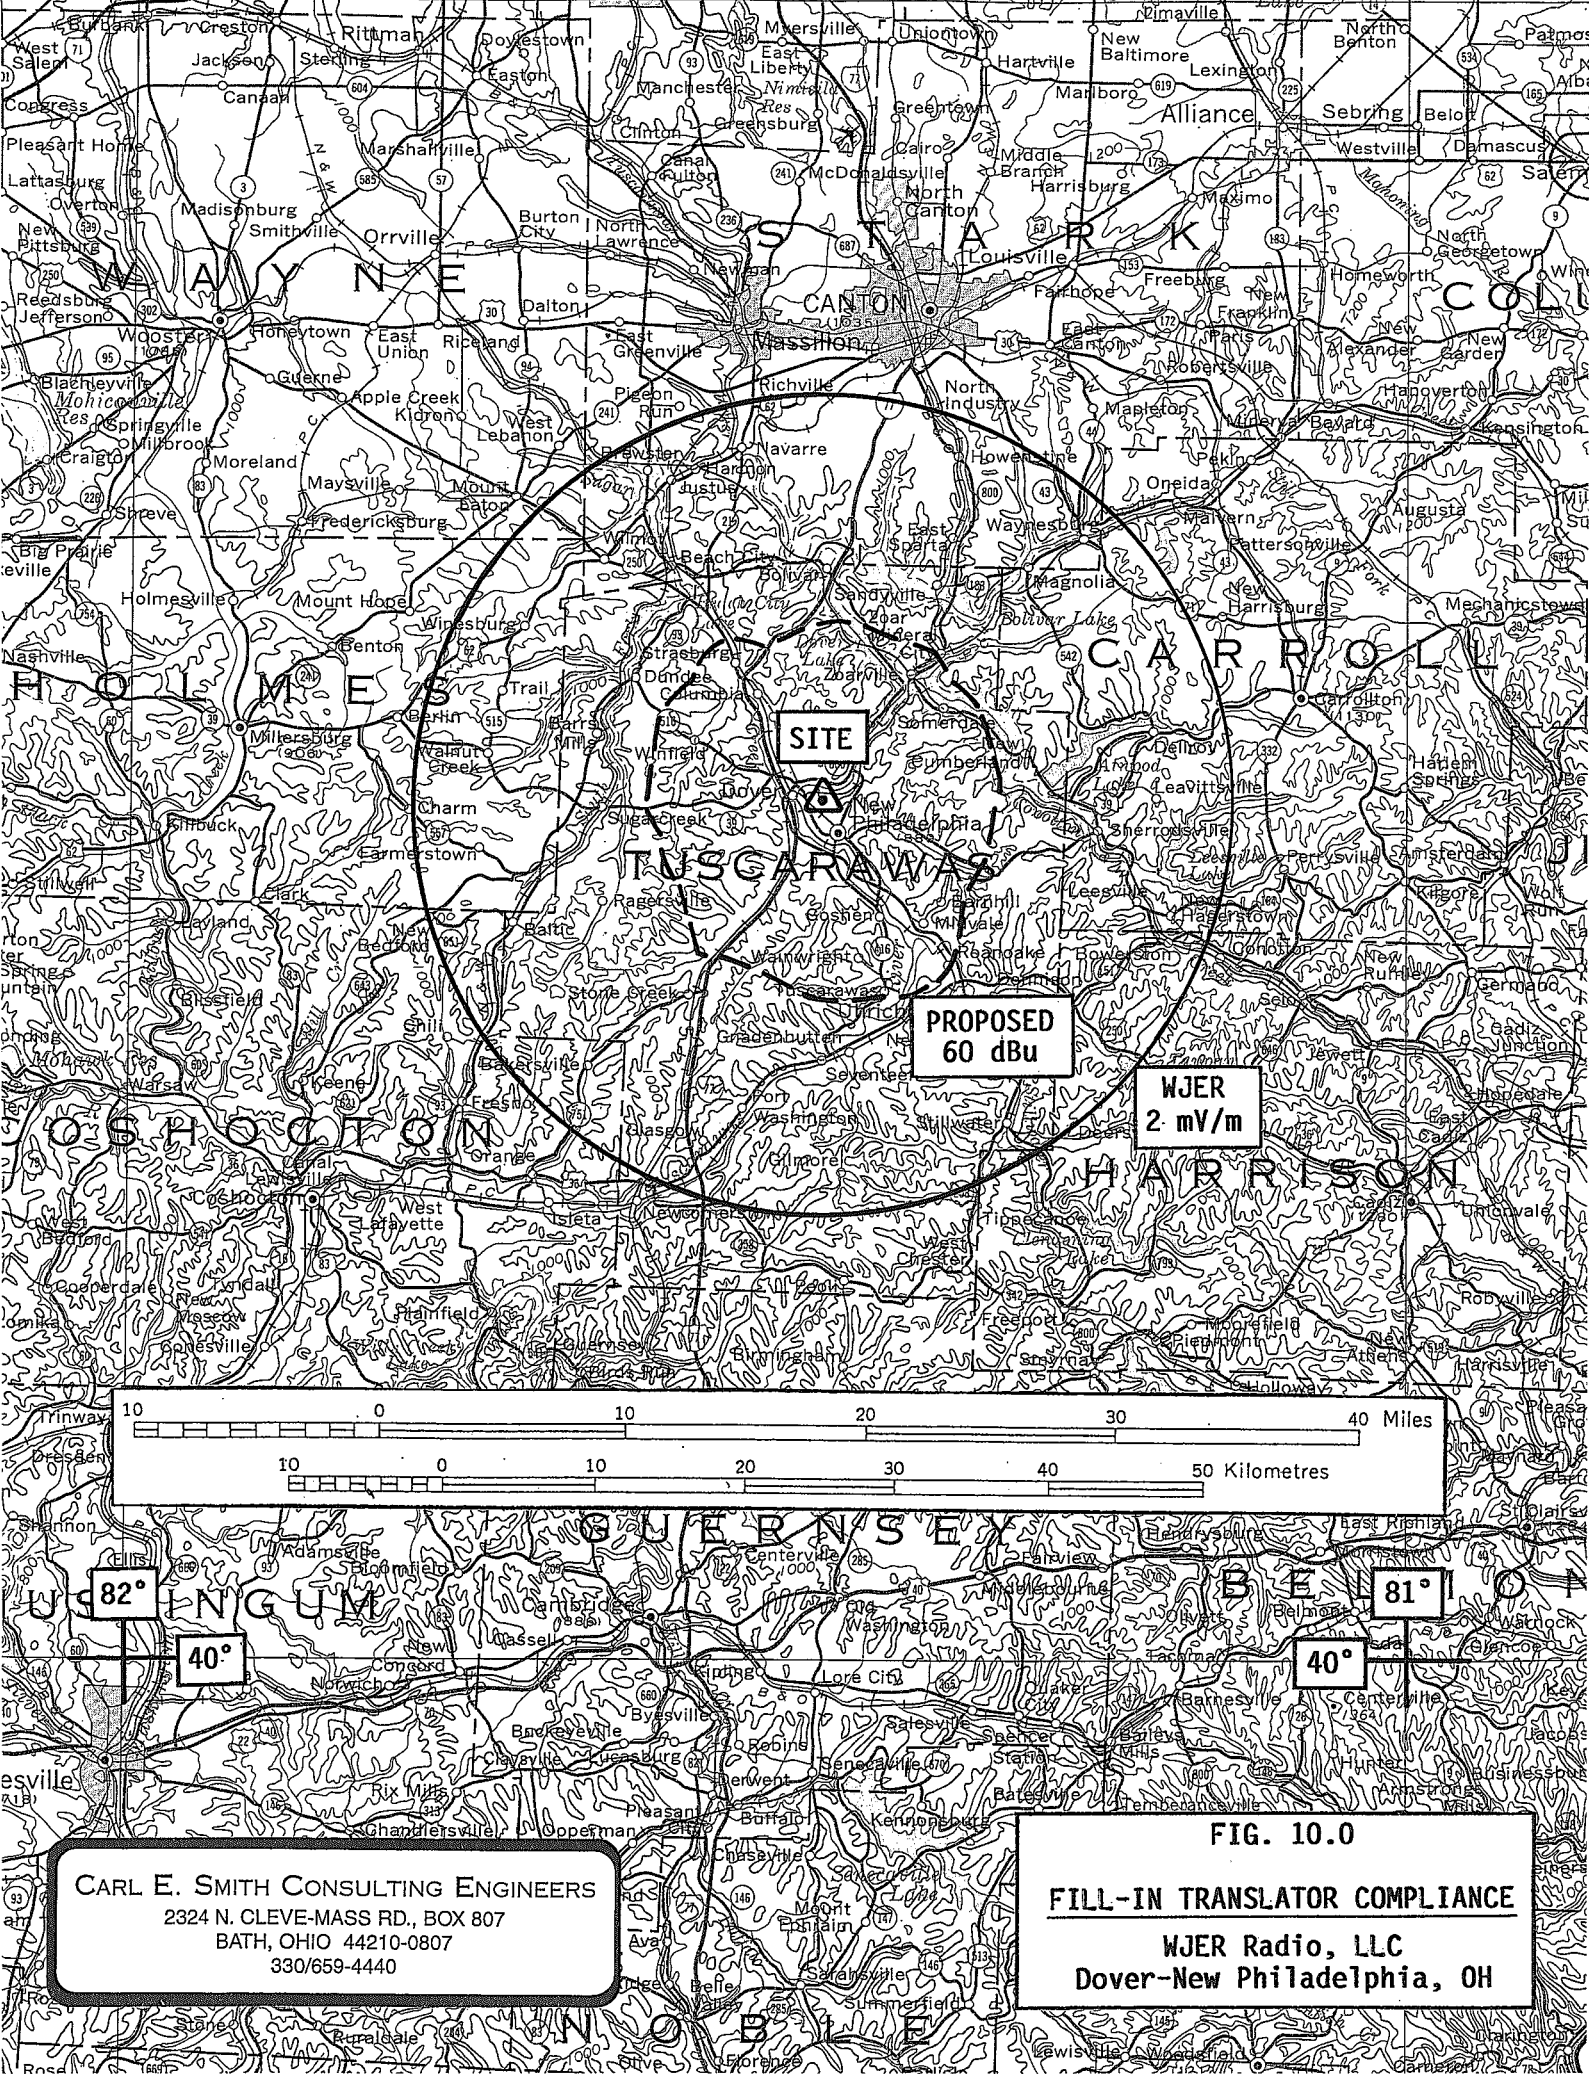

EXHIBIT 10  
(Page 1 of 2)

FILL IN TRANSLATOR REQUIREMENTS

WJER Radio, LLC.  
Dover - New Philadelphia, OH

Figure 10.0 is a map exhibit depicting the predicted 60 dBu contour for the proposed W260CP facilities in relation to the predicted 2 mV/m contour for facilities of WJER(AM) - Dover - New Philadelphia, Ohio, the proposed primary station for this translator. As shown in this exhibit, the proposed 60 dBu contour will be totally contained within the predicted 2 mV/m contour for WJER and also will not extend beyond a distance of 25 miles from the WJER transmitter site. As a result, these proposed facilities fully comply with the restrictions applicable to a fill in translator for an AM station.
