<sup>1</sup> An application is currently on file that relocates WHITE 1690 kHz from Johnston City, IL to Berwyn, IL. The required spacing for this co-channel station is 800 kHz. The proposed WHITE site is located 935.47 km from the proposed WSWK site at Avondale Estates, Georgia. It is therefore requested that this application be accepted as contingent to the WHITE application. A waiver if necessary of the contingent application is attached to this application.
