Re: KYCC (FM), Stockton, California  
Facility Identification Number: 63464  
Your Christian Companion Network, Inc.  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed February 7, 2008, on behalf of Your Christian Companion Network, Inc. ("YCCN"). YCCN requests further extension of special temporary authority ("STA") granted on February 17, 2005, to operate Station KYCC from a site other than the licensed site.<sup>1</sup> In support of the request, YCCN provides a report on its progress toward constructing new, permanent facilities for Station KYCC. YCCN states that it has received local building permits and that it is waiting for the local electric utility to install three-phase power at the site.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

---

<sup>1</sup> KYCC is licensed for operation on Channel 211B (90.1 MHz) with effective radiated power of 26 kilowatts (H&V) and antenna height above average terrain of 55 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KYCC may continue to operate with the following facilities:

Geographic coordinates:	37° 57' 31" N, 121° 16' 56" W (NAD 1927)
Channel	211 (90.1 MHz)
Antenna type:	Three Scala, type CL-FM log periodic antennas oriented at azimuths 130°, 180°, and 320° T.
Effective radiated power:	Not to exceed 3 kilowatts at 155° T; 0.2 kilowatt at 320° T.
Antenna height:	
above ground:	145 meters
above mean sea level:	152 meters
Above average terrain:	143 meters
ASRN <sup>2</sup>	1064433

YCCN must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 23, 2009**.

Sincerely,

Charles N. Miller, Engineer
