

Engineering STA Request

A request for STA for WJCH to operate at an alternative site was granted on December 17, 2007. That site is now not available, thus the STA request is hereby amended to specify a new site.

On Saturday, December 1, 2007, the top portion of the WJCH tower collapsed in a severe ice storm. The portion of the collapsed tower contained the WJCH antenna, which was also severely damaged. The Licensee of WJCH, Family Stations, Inc., is the owner of the tower. The tower will have to be completely rebuilt before WJCH will be able to again commence operations of its licensed facility. Family Stations, Inc. will immediately begin the tower repair process and will work diligently to resume WJCH's operations at its licensed location.

Special Temporary Authority (STA) is requested to operate WJCH at the amended alternate site as specified below:

	LICENSED	STA PROPOSED (AMENDED)
ERP	50 kW, circular, non-directional	1.35 kW, circular, non-directional
COORDINATES	41 24 55 / 88 16 19	41 32 26 / 88 02 08
ASRN	1010033	1008722
HAAT	151 M	86 M
SITE AMSL	186 M	198 M
TOWER AGL	141 M	152 M
TOWER AMSL	327 M	350 M
COR AGL	131 M	148 M
COR AMSL	319 M	346 M

The proposed amended STA site is located 24.15 km, 54.8 degrees from the licensed site. The 1 mV/m contour coverage of WJCH from the proposed amended STA site will be contained within WJCH's licensed 1 mV/m contour, and will continue to provide 1 mV/m contour coverage over the community of license of Joliet, IL (reference map on page 2 of this Exhibit).

A 2-bay RFS CPF500-2 antenna will be utilized, with 163 meters of Andrew LDF6-50 transmission line, resulting in a TPO of 2 kW.
