Re: WOGT Directional Antenna Installation

To Whom It May Concern:

I, David Fisher, am the Chief Operator of WOGT, East Ridge and an employee of Citadel Broadcasting Company. I directly supervised the assembly and the installation of the WOGT directional antenna system. On May 3<sup>rd</sup>, 4<sup>th</sup>, and 5<sup>th</sup> the Shively three bay antenna array was constructed and installed on the tower in accordance with the manufacturer's instructions.

I personally oversaw the orienting of the antenna system with a licensed surveyor to bring the direction of the main lobe of the antenna to 220.0 degrees true in accordance with our construction permit.

I, David Fisher, have worked as a radio broadcast engineer since 1988. During these years I have maintained, repaired and installed all aspects of FM and AM radio transmission.

I certify that the WOGT directional antenna system has been installed as indicated above.
