

Engineer's Statement in support of  
FCC FORM 349  
APPLICATION FOR AUTHORITY TO CONSTRUCT OR MAKE CHANGES IN AN FM  
TRANSLATOR OR FM BOOSTER STATION  
(For a New FM Translator)

This is a long form application by Circuitwerkes, Inc. (the Applicant) for a new FM Translator serving the community of Lake City, FL. The Applicant previously filed a short form, BNPFT-20030317MWM, facility ID 158533.

The proposed facility is in compliance with 47 C.F.R. Section 1.1306 with regards to radio-frequency electromagnetic exposure in that the contribution to the rf environment is less than 5% of the maximum public exposure.

This application was prepared using FCC 30-arc-second terrain data.

The maximum ERP is limited by the height-above-average-terrain bearing 210-degrees. The HAAT in this direction is 70 meters. The maximum ERP for this height is 0.038 kW.

The proposal is sufficiently distant from all facilities mentioned in 73.1030(a), (b) & (c) so that notification under 73.1030 is not required.

The proposal is collocated with WJTK, a 3<sup>rd</sup> adjacent authorization. WJTK's signal strength is predicted to exceed the proposal's signal by more than 21dB in all locations. Therefore this proposal should be acceptable under 73.1204(d).
