Re: WWCS (AM), Canonsburg, Pennsylvania (FCC Facility ID No. 73981); Request for Corrected License Issuance

Dear Madam Secretary:

On behalf of our client, Birach Broadcasting Corporation, the Licensee of Radio Station WWCS (AM), Canonsburg, Pennsylvania ("Station"), we respectfully request the reissuance of its Station license to correct certain typographical errors therein (copy of the Station License and Engineering Section of the Application BL-19941209AB are attached). Specifically two items need to be corrected on the License and they are as follows:

1. The License Application listed the nighttime common point current 3.29 Amperes, and the License lists it as 2.39 Amperes. The numbers were clearly transposed; the License should list 3.29 as the nighttime common point current.
2. The License Application listed the common point resistance for the nighttime 50.0 Ohms, but the License lists it as 0.5 Ohms; again another transposition. The proper common point resistance is 50 Ohms.

Please re-issue the Station license with these typographical corrections. If you should have any questions, please do not hesitate to contact our office.

Very truly yours,

John C. Trent
