

STATEMENT OF COMPLIANCE: WHBY DIRECTIONAL ANTENNA PATTERN

Before construction commenced for the FM translator facility described herein, WHBY made complete measurements of their directional antenna system.

After the installation of two FM translator antennas on the towers used by WHBY-AM 1150, the system was checked, adjusted and verified to be within normal operating parameters. The monitor points were checked and found to be within proper limits. This fulfills the conditions of the construction permits of FM translators W256DD and W292FA.
