### SURVEYOR'S REPORT AND CERTIFICATION

I hereby certify that on the afternoon of July 18, 2018, I performed a field inspection at the WVLO Tower Site off Hume Road near Lima, Ohio. The purpose of this field inspection was to confirm that a newly installed antenna was pointed from the tower in a true north (astronomic north) direction.

Based on my best visual observation from ground level, I can confirm that this antenna was installed as intended at an azimuth of zero degrees (true north). It should be noted that a true north azimuth line was originally monumented on June 21, 2017, and by use of GPS instrumentation, I was able to confirm that the "T-post set along Hume Road" (see attached drawing copy designated "Exhibit A") had not been disturbed. Thus, the contractor performing the installation was able to use a monumented backsight that was in its correct position.

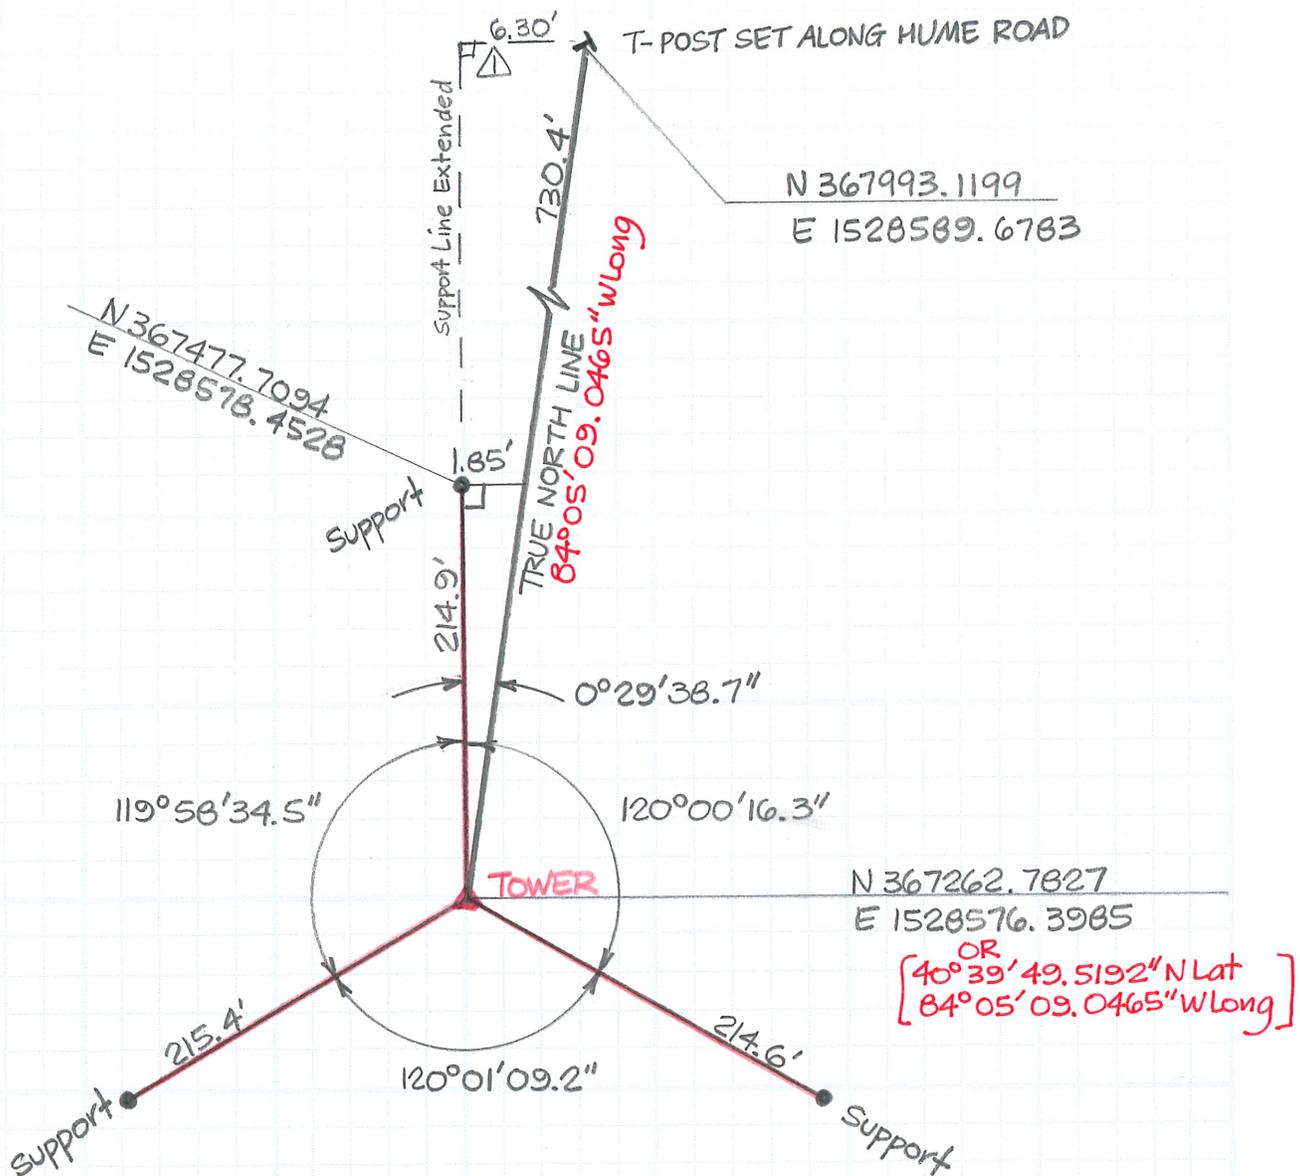

Michael G. Buettner, P.S.  
Ohio Registered Surveyor No. 6881
