In re: Low Power Television Application of:  
George S. Flinn, Jr.  
Channel 6, Memphis, TN.  
File number BMPTVL-20090921AAD  
Facility Id No.: 23848

Dear Applicant:

We are currently processing your above-referenced application. Our preliminary engineering review reveals a discrepancy with the towers overall height above ground level based on the ASRN number provided in the proposed construction permit 1249321 as follows:

The overall height above ground level as indicated in the proposed construction permit is 276.0 meters

Specified Search							
Registration Number like <b>1249321</b>							
	Registration Number	Status	File Number	Owner Name	Latitude/Longitude	Structure City/State	Overall Height Above Ground (AGL)
1	1249321	Granted	A0455914	Flinn Broadcasting Corporation	35-12-34.3N 089-49-01.4W	Bartlett, TN	275.8

The difference in height proposes a 0.2 meter tower height increase which will require approval and re-registration with the FAA.

In addition to the tower height issue, our preliminary engineering review reveals that your proposed facility does not comply with the Commission's interference rules. Specifically, the proposal is predicted to cause interference to the following facilities:

1. W06AW, Selmer, TN. – BLTVL-19990329JA

You are hereby given the opportunity to file a minor amendment to resolve the specified tower height issue and interference problem within (30) days from the date of this letter. Amendments must be filed electronically. If not so amended, your application will be considered incomplete and subsequently dismissed.

Sincerely

Hossein Hashemzadeh  
Associate Chief  
Video Division  
Media Bureau
