

Exhibit E-10

The construction permit as issued by the Commission listed two special conditions or restrictions. This exhibit is included to demonstrate that the application complies with, or would comply with, these special conditions.

The first of the special conditions pertains to worker safety and radiofrequency radiation. Under this special condition, the applicant is required to coordinate with other users of the site to protect workers from being exposed to levels of radiofrequency radiation in excess of FCC guidelines. The applicant certifies that it will coordinate with all present and future users of the site to ensure that workers are not exposed to harmful levels of radiofrequency radiation. Such coordination will include, but is not necessarily limited to a reduction in the transmitter power or cessation of operation.

The second special condition or restriction pertains to the filing of this license application prior to the commencement of program tests. The applicant certifies that program tests have not yet commenced. Program tests will commence pursuant to automatic program test authority once this license application has been filed with the Commission.

Please provide a purchase order number for this invoice. If you do not have a purchase order number, please send this invoice directly to the department which placed the order for payment.

Provide department name, contact name and phone number of the person who placed the order.

If you have any questions please feel free to contact me.
