

This map shows the proposed green field strength contour (60 dBu) for WREF, overlaid on the community boundary of Lisbon, New Hampshire. The map includes a grid with latitude and longitude coordinates. Key locations marked include South Peacham, Barnet, Mosquitoville, McIndoe Falls, Tinkerville, Parker Hill, Barrett, Franconia, Lisbon, Savageville, Jockey Hill, Landaff Center, Ireland, Nutter, Swiftwater, Benton, Boutin Corner, Easton, Boltonville, Ryegate Corner, East Ryegate, South Ryegate, and Newbury Center. The community boundary is outlined in red, and the proposed green field strength contour is shown in green. A blue cross marks the location of WREF. Arrows indicate the direction of signal propagation from the station.
