In evaluating the proposed maximization of W30DF-D FID 182968 low-power digital television station, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. It was discovered that W30DC-D FID 182618 BNPDTL20090825BAK would receive lethal interference. After a thorough search was made, it was discovered that channel 25 would not cause other stations lethal interference. Thus Rural Life Foundation requests that W30DF-D be allowed to move to channel 25
