Clark Ortiz

KOBS-LP: Flash-cut to Digital (ch 19d)

**EXHIBIT 11**

**LPTV MINOR MODIFICATION – INTERFERENCE STUDIES**

1. Mr. Clark Ortiz ("Applicant") is the licensee of KOBS-LP, San Antonio, TX, analog channel 43, with a CP for analog channel 19 (FCC File No. BMPTTL-20070406AAB). By this digital flash-cut minor modification application of the CP, Applicant proposes to operate KOBS-LP as digital on channel 19.

2. This application is within the coordination distance to Mexico.

3. Attached as Figure 1 are the OET-69 study results for the proposed facility (as the referenced station) as determined on a Sun Computer using a Solaris (Unix-based) operating system and using the same OET-69 software as developed for use by the FCC. (According to the software developer, the program used herein provides identical results as the FCC's OET-69 processing program.) Except for those stations also licensed, authorized or proposed by the applicant, or those stations that have consented to predicted interference from this proposal, the proposed facility adequately protects all US broadcast stations as required by the FCC Rules. All studies are conducted in accordance with current FCC Rules and Regulations.

4. The applicant accepts any interference that is predicted to exist to the proposed facility by any licensed, authorized or previously proposed primary TV station. The applicant also accepts any interference that is predicted to exist to the proposed facility by any licensed or authorized secondary TV station, or by any secondary TV facility that is given preferential status by the FCC over the Applicant's herein proposed facility.
