

**ENGINEERING STATEMENT OF JAMES D. SADLER  
IN SUPPORT OF A REQUEST FOR  
SPECIAL TEMPORARY AUTHORITY  
STATION KBIQ - MANITOU SPRINGS, COLORADO  
CH 274C - 72 kW ERP - 695 M HAAT  
Facility ID: 73073**

**Licensee: Bison Media, Inc.**

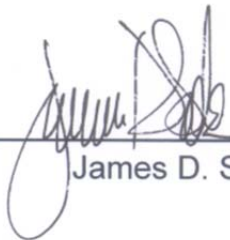

I am a Technical Consultant, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission.

This office has been authorized by Bison Media, Inc. (herein "Bison"), licensee of FM Broadcast Station KBIQ, Manitou Springs, Colorado, to prepare this engineering statement in support of a request for Special Temporary Authority ("STA"). Station KBIQ is licensed to operate on Channel 274C with an effective radiated power of 72 kilowatts and an antenna radiation center height above average terrain of 695 meters.

The station is having issues with its transmitter which has limited the transmitter output power to 60 percent of the licensed value. Bison is currently operating with the reduced effective radiated power while seeking repair of the transmitter. Bison respectfully requests that STA be granted to continue operation at reduced power until the repair of the transmitter can be completed.

This engineering statement was prepared by the undersigned and the information contained herein is believed to be true and correct.

DATED: March 18, 2021
